

## **Garden Mums    Item# 85852 , 60123**

Refresh the color in your garden as the weather cools for fall. Mirror the beauty of fall leaves on your porch or in your garden with Garden Mums. Mums come in amazing hues of gold, bronze, crimson and purple, perfect for fall. They love the cooler nights and sunny days.

Place your Garden mum in full sun to part sun. Keep the soil evenly moist for best performance, but never sitting in water for long periods.

Garden mums can be perennials but the majority will not survive our winter. Most Garden mums planted in the fall will not come back next year. Planting in a protected area and planting them green with no buds in the summer months is a way to increase your chances but is not a guarantee.
